Stampi per vaschette gelato *Moulds for gelato pans*

Top Ice è la linea di stampi in silicone per la decorazione delle vaschette gelato. Cinque trame diverse e due formati che impediranno sbalzi di temperatura e fastidiose patine ossidative sul vostro gelato.

Top Ice is the line of silicone moulds for decorating gelato pans. Five different textures and two sizes that will prevent temperature changes and annoying oxidative films on your gelato.

Top Ice

Top Ice è la linea di stampi in silicone per la decorazione delle vaschette gelato. Il modo nuovo di creare una vetrina capace di catturare lo sguardo e una soluzione ideale per la conservazione: Top Ice annulla l'effetto "defrost", evitando che gelato subisca sbalzi di temperatura e impedisce la formazione della fastidiosa e antiestetica patina sul gelato, dovuta all'ossidazione. Questo significa più libertà e meno lavoro. Cinque trame diverse, tutte da interpretare in modo personale, per dare a ogni gelato l'aspetto che si merita. /

Top Ice is the line of silicone moulds for decorating gelato pans. The new, simple and quick way to create a shop window able to catch the eye: Top Ice nullifies the "defrost" effect, your gelato will not be subjected to sudden changes in temperature, but kept stable. It helps avoiding the formation of that pesky, unaesthetic coat on the top of your gelato, due to oxidation. The final result: less work, more freedom. Five different textures, all to be interpreted and decorated in a personal way, to give each ice cream the look it deserves.

Serie N
N Series

Fra impilabile e sovrapponibile c'è una differenza di 180°. Se sovrapposti in una direzione i contenitori serie N possono essere facilmente inseriti l'uno nell'altro, recuperando spazio. Con una rotazione di 180°, però, possono essere impilati per lasciare al loro interno il contenuto e migliorare così la gestione delle merci, i tempi di movimentazione e la logistica generale. Sono disponibili con pareti piene o forate.

There is a 180° difference between nesting and stacking. If positioned in one direction, N series crates can be readily nested, thus saving space. However, by rotating by 180°, the pieces can then be stacked so that the content remains inside them, thus making for optimal management of goods, handling times and general logistics. These pieces can be provided with closed or perforated sides.
